☒ (X) NO NEW COMMENTS WERE RECEIVED

☐ () NEW COMMENTS WERE RECEIVED

OEA served an Environmental Assessment (EA) for this proceeding on December 23, 2011 for public review and comment. In the EA, OEA recommended 1 environmental condition and concluded that the proposed action would not significantly impact the quality of the human environment.

Conclusions

The EA comment period has ended and no new comments were received. Accordingly, OEA recommends that the condition previously recommended in the EA be imposed upon any decision granting abandonment authority:

1. Wisconsin Central Ltd. shall consult with National Geodetic Survey (NGS) and notify NGS at least 90 days prior to beginning salvage activities that will disturb or destroy any geodetic station markers.

If the above condition is imposed, OEA believes that the proposed action will not significantly affect the quality of the human environment.
